WORK EXPERIENCE

Final Year Project

FIXIT Web and App

Developed FIXIT, a web and mobile application that connects users with local service providers for services such as home repairs, cleaning, and health care. The platform includes dedicated interfaces for users, service providers, and admins to manage bookings, profiles, and service requests efficiently. Key features include real-time chat, dynamic bidding, and secure online payments. The project focused on delivering a smooth, reliable, and user-friendly experience for all users.

Technologies: Backend: Laravel 10 (PHP)
Frontend: Blade, Vue.js / React
Database: MySQL / PostgreSQL

Personal Project

Employee Management System

Developed a responsive Employee Management System using React for efficient employee data management.
Focused on user-friendly interface design and optimized performance for seamless user experience.

Technologies:
Languages: Html/CSS/Javascript
Libraries: Reactjs/Bootstrap
